SPECIAL RULES

EASTWARD TRAINS ARE SUPERIOR TO WESTWARD TRAINS OF THE SAME CLASS.

RULES GOVERNING INTERLOCKING PLANT, NORTHERN PACIFIC RAILROAD CROSSING, BLACK RIVER

All movements are governed by distant and home light signals located as follows:

Por Eastward Trains:

Distant signal located.....2300 feet west of tower

Home signal located....... 800 feet west of tower

For Westward Trains from Seattle:

Distant signal located—1500 feet east of tower

Home signal located....... 800 feet east of tower

For Westward Trains from Black River Yard via Wye:

Distant signal located.....1200 feet east of tower

Home signal located....... 800 feet east of tower

Trains approaching interlocking plant, desiring to use main line to Tacoma or Seattle will sound one long blast of the whistle. Trains desiring to use wye, will sound four long blasts of the whistle.

BULES GOVERNING OREGON-WASHINGTON BAILBOAD & NAVIGATION CO. INTERLOCKING PLANT, BLACK RIVER

Train order semaphore is in front of Interlocking tower. The following whistle signals will be used:

Trains to O.-W. R. & N. Co. Interchange track-1 long, 1 short.

Trains Tacoma to Argo-1 long, 1 short, 1 long.

Trains Argo to Tacoma-1 long, 1 short, 1 long.

Trains Argo to Renton-1 long.

Trains Renton to Argo-1 long.

The upper semaphore arms and lights control for the through Pacific Coast Railroad Co. Tracks and the second semaphore arms control for the diverging routes to the C. M. St. P. & P. Co. Tacoma line and O.-W. R. & N. Co. Lower semaphore arm controls switching movement. Backup movements are controlled by dwarf signals.

Passenger trains will register by card at Tacoma Jct. and Black River.

Automatic Block System is in use between Tacoma and Black River. See Rules 221-B, 311, 362 and 505-B.

Between Black River and Spokane St. Tower, Seattle, Pacific Coast Railroad Co. time table and rules govern.

Between Argo and Union Passenger Station, Seattle, O.-W. R. & N. Co. time table and rules govern.

No. 16 stops on signal North Puyallup, Sumner, Auburn and Kent for revenue passengers, destined to Seattle and points east only.

No 16 stops at Sumner for express on flag.

No. 15 will stop at Kent, Auburn, Sumner and North Puyallup to let off revenue passengers from Seattle and points east.

Nos. 561, 562, 563 and 564 will stop at Kent, Auburn, Sumner and North Puyallup only to receive and discharge passengers to and from points beyond Tacoma or Seattle and will not stop for passengers from Tacoma or Seattle.

Double track in use between Tacoma Jct. and Tide Flats Yard. Trains, or engines, on double track between Tacoma Jct. and Tide Flats Yard will use the **EIGHTHAND** track moving in either direction. Such trains, or engines, will have the right to move on the properly assigned track without train orders, or clearance card. No trains, or engines, will exceed a speed of fifteen (15) miles per hour and the movement must be made under complete control at all times, expecting to find track occupied or cross-over and reverse movements being made. No movement by any train, or engine, is allowed on either track against the current of traffic, excepting under full flag protection and then only in case of emergency. Yard conductor will be held responsible for knowing that movement from Northern Pacific Railway Co. Transfer Track to Tide Flats Yard against current of traffic is fully protected.

Railroad crossing of Northern Pacific Railway Co. now in service across our double track line at Lincoln Avenue, East of Tacoma Roundhouse. is protected by gates, and extreme care should be used in approaching this crossing expecting to find gates against movement on our line. When it is known that gates are against Northern Pacific Railway Co. track and the way is clear, C. M. St. P. & P. Co. trains need not stop for this crossing.

Trains 17 and 18 will stop on flag at Kent, Auburn, Sumner and North Puyallup to pick up or discharge passengers and express.

SPECIAL RULES

EASTWARD TRAINS ARE SUPERIOR TO WESTWARD TRAINS OF THE SAME CLASS.

On mountain grades, at meeting points made by special order, the ascending train will take siding unless otherwise specified in the order.

Train No. 16 will reduce speed to ten (10) miles per hour while entering passenger station at Othello.

Mountain grade, between Beverly Jct. and East switch, Kittitas.

Automatic Block System is in use between Othello and Cle Elum. See Rules 221B, 311, 362 and 505B.

The following automatic block signals are placed on left hand side of track as seen from approaching train:

Signal 186-2, Eastward between Horlick and Thorp.

Signal 103-6, Eastward just west of Othello station.

Nos. 117 and 118 will lose both class and schedule between Beverly and Beverly Jct. when one hour or more late. Bulletin boards at Beverly and Kittitas are for the use of work train crews, helper crews, and crews on Beverly Jct. and Hanford Subdivision only.

SPECIAL RULES

EASTWARD TRAINS ARE SUPERIOR TO WESTWARD TRAINS OF THE SAME CLASS

Gates have been installed at the following points: At Western Washington Railroad Co. crossing at Woodruff; at Everett Log Dump Co. crossing of our Riverside Line, Everett Yard, and at Great Northern Railway Co. crossing 0.6 mile west of Monroe. Gates will normally be locked against trains on the Western Washington Railroad Co's. tracks, on the Everett Log Dump Co's. tracks, and on the Great Northern Railway Co's, tracks. C. M. St. P. & P. trains should approach these crossings under control, but unless gates are set against them, it will not be necessary for them to stop.

Gates have been placed in service at each end of Ebey Slough drawbridge which is located 1.2 miles east of Belt Yard and 4.2 miles west of Snohomish. It will not be necessary for trains to stop at this drawbridge unless the gates are against them, except during stormy or foggy weather when view is obscured, when regular stop must be made. Trains must be under control and able to stop before reaching the gates if the bridge is open, and in no case should the speed exceed ten miles per hour passing over bridge.

INDUSTRIAL TRACKS NOT SHOWN AS STATIONS

Cherry Valley1.5 miles east of Carnation
County Poor Farm Spur1.0 mile west of Monroe
Galvers 1.25 miles west of Fall City
Horrocks 2.0 miles east of Carnation
Lazarus Spur

Markel Lbr. & Shr.	Co	High Rock
Meadow Brook	1.6 miles west	of No. Bend
Novelty	2.4 miles eas	t of Duvall
Stuart	0.8 mile west	of Stillwater
Tokul Creek	1.5 miles w	est of Tokul

First class trains will stop on flag at Edgewick, Meadow Brook, Novelty and Cherry Valley for passengers and

First class trains will run under control and all other trains will reduce speed to six (6) miles per hour approaching and passing through yard limits at Snoqualmie Falls, expecting to find main line occupied.

MAXIMUM SPEED PERMISSIBLE

Freight Trains

Passenger Trains Between Cedar Falls and Carnation ... Between Carnation and Everett

That part of Rule 19 and D-19 in the Book of Rules and Regulations pertaining to the kind of marker to be displayed is changed to read "By day a green flag or marker lamps not lighted."

Rule 19-A of the Rules and Reguluations of the Operating Department requiring the display of a red light in the cupola of the caboose on freight and work trains is hereby withdrawn, and the display of red light in the cupola of caboose will be discontinued.

All trains must obtain Clearance Card Form A or Al before leaving initial station on each Sub-Division.

Conductors of all trains will register in person at Registering Stations unless authorized by special rule or by instructions of Train Dispatcher to Register by card.

FIRE PRECAUTION

Engineers must personally inspect and know before leaving a terminal and any point where front end hoppers or ash pans have been opened, that they are closed and properly secured.

Enginemen are required to report at first opportunity the presence of fires on right-of-way, unless being controlled by other employees, and if where fires may be communicated to a bridge or other structure, stop their train and assist in extinguishing the fire.

Trainmen will observe and report at first opportunity the presence of fires on right-of-way that may have been set by engines on their own or preceding trains, call the attention of their engineer to the same promptly, and require an inspection to be made of fire preventing appliances. If danger of fire being communicated to a bridge or other structure, train must be stopped to extinguish fire.

SPECIAL RULES AND INSTRUCTIONS REGARDING THE OPERATION OF TRAINS ON MOUNTAIN GRADES

Location will be Specified on Time-Tables

BRAKE RESISTANCE DECREASES AS SPEED INCREASES; THEREFORE, MUST BE CONTROLLED FROM THE START.

The Rules and Instructions referred to in the following are contained in Air Brake and Signal Instruction Book form 2697, revised and approved January, 1927.

- 1. When no helper power on rear, the last car must be one that is equipped with a good hand brake and a trainman stationed upon it at all times. Conductors are responsible for having trainmen properly stationed.
- 2. When power is used on rear of freight trains, it must be in advance of boarding outfits, empty flat cars or cars of insufficient strength to safely resist the push of such engines.
- 3. A brake pipe test as per Rules 38 and 85-A must be made when the train has been parted for any reason, except at points where outgoing test is required in accordance with Rules 34 and 80-A. A brake pipe test must also be made on eastward freight trains at Kittitas and Boylston, and on westward freight trains at Beverly, Boylston and Rockdale.
- 4. Before commencing descent of mountain grade, engineman must adjust the brake pipe feed valve to ninety pounds and have brake pipe charged to this pressure as per Rule 139.
- 5. Before commencing descent of grade from Hillsdale to Tacoma, outgoing air brake test, as per Rule 80-A, must be made and cars with defective brakes set out so that tons per operating brake shall not exceed fifty.
 - 6. All retainers must be turned up on eastward trains between Hillsdale and Tacoma, as per Rule 90-A.
 - 7. After reaching foot of mountain grade reduce brake pipe pressure as per Rule 142.
- 8. In making back up movement on mountain grade with any freight train, sufficient hand brakes must be set on rear to prevent run out of slack.
- 9. Rule 89 covering the use of hand brakes must be observed when setting out or picking up cars, also at any time road engine is cut off from train. When helper power left in train, in addition to use of hand brakes the engineman on rear helper will cut in his brake valve and keep brake pipe charged. When road engine again attached to train, engineman on rear helper will cut out his brake valve and usual brake pipe test made as per Rules 38 and 85.
 - 10. Rule 97, Inoperative Air Brakes, does not apply on mountain grades.
- 11. Trainmen must watch closely for excessive heating of wheels, and if any are found the train must be brought to a stop and remain standing a sufficient length of time to allow them to cool.
- 12. Freight trainmen will not be required to ride on top of train in electrified territory unless some real emergency condition exists which, in the judgment of the conductor of the train, would require special attention from some member of the crew located on top of a car. These instructions not to be considered as relieving trainmen from the necessity of getting on top of cars while switching operations are carried on, when necessary to do so.
- 13. When stops are made with freight trains descending Boylston to Beverly, apply and release brakes before proceeding. This to assist in controlling slack while coming into regeneration.

GENERAL

In addition to full compliance with Rule 99 in Book of Rules and Regulations of the Operating Department and special rules and instructions for the movement and protection of trains, the following will be observed for the operation of trains moving in the same direction in territory not operated under automatic, or manual block system:

Beverly Jct. and Hanford
Cedar Falls and Everett
Bagley Jct. and Enumclaw
Tacoma and Morton
Park Jct. and Ashford
Frederickson and Helsing Jct.
Maytown and Raymond

Operator will display train order signal immediately on the departure of a passenger train and not permit any train to follow such passenger train from his station until authorized to do so by the train dispatcher, except when communication cannot be had with the train dispatcher, the train held may be permitted to proceed on its right or schedule at the expiration of ten minutes after the departure of the passenger train with clearance card, reading:

0	_leftat	
and	has not passed	

The train receiving this clearance card must move with caution prepared to stop short of any obstruction until it is known that the passenger train has passed the next open station.

A train passed by a passenger train at station where no operator is on duty will not follow the passenger train until at least 10 minutes after such passenger train has departed, and during storms, foggy weather or on descending mountain grades, until at least 30 minutes, and may then move on its right or schedule but with caution prepared to stop short of any obstruction, and until it is known that the passenger train has passed the next open station.

During storms, foggy weather or on descending mountain grades, freight trains should not follow each other closer than 30 minutes, and extra caution used.

In case no passenger trains are run, following trains will be blocked behind mixed trains or such freight trains as carry passengers in the same manner as prescribed for passenger trains.

Unless otherwise instructed, motors should not be run coupled together either light or when hauling a train—when two motors are used in the same train they should be separated by ten or more cars.

When rules require the headlight to be displayed electric headlights on engines in road service will be dimmed by engineers under following conditions:

When entering or moving thru side tracks in yards where yard engines are employed.

At meeting points when standing waiting arrival of approaching train or trains.

When standing on sidings, in yards, or at engine terminals.

Engineers will be governed by Rule 17 when a train turns out to meet another and has stopped clear of main track, or is standing to meet trains at the end of double track, or at junctions.

Should a train be held for 30 minutes at a telegraph station after telegraph office is closed for the day, the Conductor will call Operator. If held for 30 minutes at a non-telegraph station, Conductor will report to the Train Dispatcher on the telephone.

STRETCHERS

Othello, Beverly, Ellensburg, Cle Elum, Rockdale, Cedar Falls, Tacoma, McKenna, Ashford, Mineral and Black River.

RAILROAD CROSSINGS

The Washington State Law governing movement of trains over railroad crossings at grade is as follows: "Trains shall stop at railroad crossings; all railroads and street railroads operating in this state shall cause their trains and cars to come to a full stop at a distance not greater than five hundred (500) feet before crossing the tracks of another railroad crossing at grade, excepting at crossings where there are established signal towers and signal men, interlocking plants or gates."

SPEED RESTRICTIONS

The speed of passenger trains will normally be that prescribed by the schedule, but where trains have been delayed the speed will be so moderately increased above that prescribed by the schedule as in the judgment of the conductor and engineer in charge of the train, may be prudent; due consideration being always given to conditions of track, comfort of passengers and all the circumstances.

The following speed restrictions will be strictly observed:

Class K-1 engines in passenger service and equipped with swing motion trucks will not exceed thirty-five miles per hour; when equipped with rigid trucks will not exceed twenty-five miles per hour. Class L engines on passenger trains must not exceed thirty-five miles per hour.

Freight engines with single trucks will not be permitted to run in excess of thirty-five miles per hour when handling or helping passenger trains.

Mallet engines must not be run to exceed twenty miles per hour and at any point where conditions require it, a reduction of speed must be made to meet the requirements.

Speed of steam engines while running in back-up motion will not exceed twenty miles per hour on tangent track and fifteen miles per hour on curves of three degrees or over. The speed to be further reduced where instructions or local conditions require it; provided, that pass enger engines equipped with back-up head lights and pilots may run thirty miles per hour.

Trains handling special equipment will not exceed the following speeds:

Rotary snow plows, twenty-five miles per hour.

Lidgerwood unloaders, fifteen miles per hour.

Steam shovels and steam ditchers, twenty miles per hour.

Trains having mail for where they do not stop will slow up to fifteen miles an hour for dispatching this mail.

Trains handling steam derrick will observe the following speed restrictions between points shown below unless otherwise directed.

Between Tacoma and Seattle, 25 miles per hour.

Between Seattle and Cedar Falls, 25 miles per hour.

Between Cedar Falls and Rockdale, 20 miles per hour.

Between Hyak and Kittitas, 25 miles per hour.

Between Kittitas and Beverly, 20 miles per hour.

Between Beverly and Othello, 25 miles per hour.

Everett Line, Cedar Falls to Everett, fifteen miles per hour.

Enumclaw Line, fifteen miles per hour.

Tacoma to Morton, fifteen miles per hour.

Frederickson to Helsing Jct., twenty miles per hour.

Maytown to Raymond, fifteen miles per hour.

Freight trains hauling logs will not exceed twenty miles per hour on any line.

The speed of all trains approaching railroad crossings at grade and interlocking plants must be controlled. Passenger trains must not exceed twenty-five (25) miles per hour and other trains twenty (20) miles per hour passing over railroad crossings and through interlocking plant limits.

The speed of all trains passing through cross-overs, entering upon or leaving ends of double tracks, passing tracks or other side tracks must be controlled and not exceed ten (10) miles per hour, except at designated turn-outs laid with long frogs where speed may be increased to, but not to exceed, twenty (20) miles per hour.

MAIN LINE

Passenger trains reduce speed to thirty-five miles per hour around curves in vicinity of Corfu Slide about two and one-half miles west of Taunton.

Freight trains will not exceed twenty miles per hour around curves between Taunton and Corfu and between Thorp and Cle Elum.

Eastward freight and passenger trains between Boylston and Beverly will stop at Rye to permit trainmen to inspect trains and to cool the wheels. In above district if trains are handled by exclusive regenerative braking, they need not stop for inspection or to cool wheels.

Trains will reduce speed to twenty miles per hour over bridge FF-16, one and seven-tenths (1.7) miles West of Easton.

Freight trains will reduce speed to fifteen miles and passenger trains to twenty miles per hour around curve at Sumner.

No train or engine will exceed fifteen miles per hour between Tacoma Junction and Tide Flats yard.

Trains will not exceed eight miles per hour through coach yard Tacoma.

Trains will not exceed eight miles per hour through City Limits of Auburn and Kent.

Westward freight trains between Rockdale and Cedar Falls will stop at Garcia to permit trainmen to inspect train and to cool wheels. In above district if trains are handled by exclusive regenerative braking, they need not stop for inspection and to cool wheels.

EVERETT LINE

Do not exceed fifteen miles per hour over Tokul Creek bridge FF-842 West of Tokul.

FREDERICKSON AND HELSING JCT. SUB-DIVISION

Extreme care, and as much slower speed as will insure safety, should be maintained around curves West of Mumby and at other points where track conditions require caution.

All trains will reduce speed to 15 miles per hour approaching the highway crossing about two miles west of Rainier.

NATIONAL PARK LINE

Between Hillsdale and Tacoma, eastward passenger trains will not exceed twenty miles per hour and freight trains will not exceed twelve miles per hour.

Passenger and freight trains will not exceed fifteen miles per hour between LaGrande and three and one-half miles West.

All trains will reduce speed to 5 miles per hour over street railway crossing at Midland, also over highway crossing about 400 feet West of the street railway crossing at Midland.

Passenger trains on maximum grade between Tacoma and Hillsdale will not exceed schedule time.

All trains reduce speed to fifteen (15) miles per hour over bridge GG-76 Nisqually River.

WILLAPA HARBOR LINE

Trains handling rotary snow plows, lidgerwoods and ditchers will not exceed fifteen miles per hour.

Trains must approach and pass over street crossings at Chehalis and Centralia at a speed not to exceed six miles per hour. When switching over these crossings engine and trainmen must exercise special care in the protection of street traffic.

All trains must be under full control before reaching East switch at Sutico.

MAYTOWN AND RAYMOND SUB-DIVISION RAILWAY CROSSING INTERLOCKED

The home and distant signals used in operating the interlocking plants at Dryad, Chehalis and Blakesley Jct. are upper quadrant.

At Dryad, the home signals are mechanically operated, two-position.

At Blakesley Jct. the home signals are electrically operated, two-position.

The distant signals at Dryad and Blakesley Jct. are three-position, semi-automatic.

Train movements over Northern Pacific Railroad crossing located 2.1 miles west of Chehalis, on both railroads will be governed by standard two-arm upper quadrant semaphore home signals located on right-hand side of track approximately 550 feet from crossing. Indications of these home signals are in accordance with Rules 602-A and 602-G.

Fixed distant signals with indications in accordance with Rule 603-J are located approximately 3,000 feet from the home signals.

All trains will approach the home signals under control and if "proceed" signal indication is obtained, may proceed over the crossing at speed not exceeding 20 miles per hour.

If a train is stopped at a home signal and no conflicting train movement is evident, a trainman shall proceed to the crossing and operate hand release located in box marked "Release," locked with switch lock. Instructions for operating the release are posted on inside of box. If operation of hand release does not clear home signal, the trainman at crossing, upon having made certain that the home signals on the conflicting road are at "stop" and no immediate train movement is evident on such road, may signal the train to proceed over crossing. Movements under such conditions must be made at slow speed and must be protected against conflicting movements.

Special Regulation

The following ruling by Interstate Commerce Commission.

"In long distance movements, and in handling cuts of cars over main line tracks where opposition to regular schedule trains may require emergency stops, switching, or transfer, trains must have the percentage of air brakes required by law, which is 85 per cent."

All trains moving between Tacoma Junction and Hillsdale must comply with these instructions. Also trains between Everett station and Belt Yard and also when using main line at any time in Seattle terminals.

Yardmaster will personally know that this rule is being enforced.

SPEED TABLE

SPEED	IABLE
60 miles per hour is equivalent to one mile in 1 minute and 0 seconds.	35 miles per hour is equivalent to one mile in 1 minute and 43 second
55 miles per hour is equivalent to one mile in 1 minute and 5 seconds.	30 miles per hour is equivalent to one mile in 2 minutes and 0 second

ELECTRIFICATION

When, for any cause, trouble is experienced on trolley or other over-head wires causing a dangerous condition, any one is authorized to order power shut off from nearest sub-station, reason for requesting power to be shut off must be given the train dispatcher as soon as possible. Lines should not again be energized until so authorized by the train dispatcher.

In case of accident causing live trolley wires to come in contact with cars or buildings being in danger of fire, first thing to be done is to kill the line by getting in communication with nearest sub-station or train dispatcher, and Pyrene tank should be immediately taken from motor and fire extinguished.

In cases where feeder switches are to be opened, first get in communication with nearest sub-station or train dispatcher, kill the line, then open the switches, then proceed to flag any approaching train as per rule 99. This to avoid bridging air-gaps.

Whenever pantographs or fishpole collectors are lowered, they must not be again raised in contact with trolley wire without first giving the following whistle signal one-half minute in advance; two short one long and two short blasts. In case there is no air pressure on the motor the bell must be rung and a personal inspection made to insure that personal injury will not result when collectors are raised.

When damaged trolley of which you have no previous notice is found, the train should be brought to a stop and an inspection made of the trolley. Further movement will be governed by conditions as you find them, using care and good judgment in handling of your train; complying with all other rules and instructions in regard to operation in the elec-

The Train Dispatcher should be informed of the conditions before the train proceeds, the portable telephone which is supplied in each motor being used for that purpose if there is no office available.

If it is not possible to communicate with the Train Dispatcher and conditions will permit the safe movement of the

train, a flagman should be left to protect following trains. In such cases, give full information to Chief Dispatcher at the first available point of communication.

YARD LIMIT SIGNS ARE LOCATED AS FOLLOWS:

MAIN LINE

Othello-2250 ft. west of west switch.

Beverly-2700 ft. east of east switch-2700 ft. west of west switch.

Kittitas-3000 ft. east of east switch-3000 ft. west of west switch.
